

HeraAutomatic

Steam-vacuum cleaning

HeraAutomatic

A new machine for fully ecological cleaning that ensures optimum hygiene on all surfaces.

The use of water as the main element makes it a really **safe and ecological machine.**

Thanks to its power, it is recommended for both domestic and professional use. With the 6-bar steam jet and powerful suction it offers unrivalled ecological hygiene. If necessary, Hera Automatic turns into a powerful steam iron with unlimited autonomy.

Thanks to its small dimensions it is easy to move and handle and it can be stored anywhere.

New compact and functional design.

Designed and built entirely in Italy

the hygiene
for all
surfaces

Hera Automatic

Its power features and compact dimensions make it an indispensable partner for all cleaning needs. Thanks to its small dimensions, it can be handled and moved easily and it can be kept anywhere.

Hera Automatic is the solution you were looking for.

- Powerful suction of solids and liquids
- Air cleaning
- Steam cleaning
- Instant drying
- Professional ironing

Even richer
and more
versatile

The boiler refills automatically

HeraAutomatic
MADE IN ITALY

Hera Automatic's 165°C steam guarantees deep hygiene thanks to its efficient boiler.

The boiler is one of the main components of the machine, steam is created inside it.

Limescale is the boiler's main enemy, Maxima uses technology designed to help reduce the risk of clogging and malfunction.

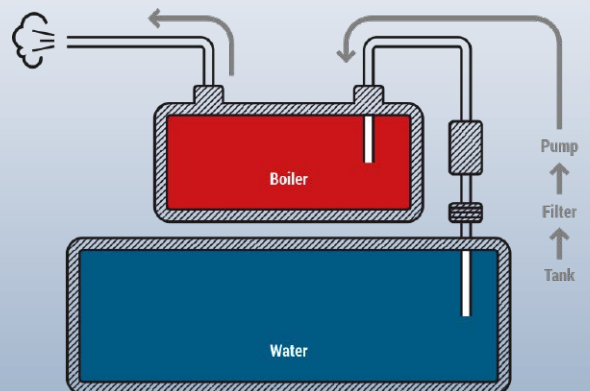

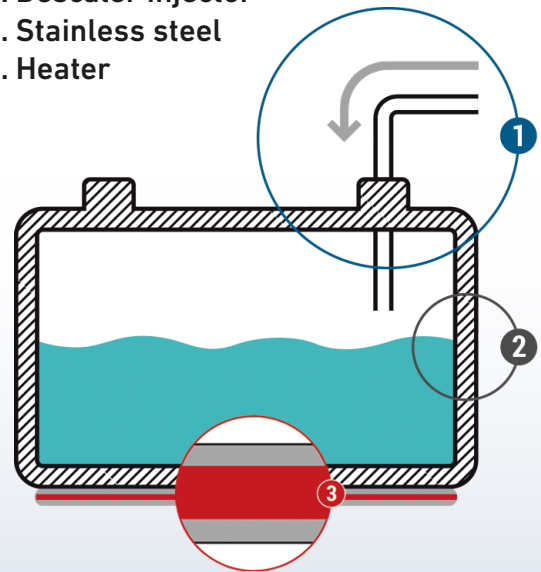

Automatic refilling

A high-pressure pump injects water directly into the boiler while always keeping the level constant when using steam. You can refill the tank even when the machine is switched on without losing time.

Hera's 165°C steam is a guarantee of deep hygiene

STEAM GENERATION

1. Descaler injector
2. Stainless steel
3. Heater

Air cleaning

HeraAutomatic
MADE IN ITALY

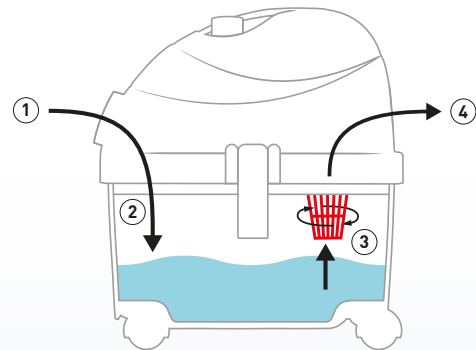

Hera Automatic's special motor performs two functions: deeply sucking the dirt and filtering the outgoing air.

The exclusive molecular separator mechanically intercepts the smallest dirt particles and guarantees constant air filtration. Thanks to it, the engine will not suffer the loss of suction due to dirty filters that need to be replaced.

The aspiration of Hera Automatic is always at maximum efficiency.

Sucking up dirt is not enough, it must definitely be trapped

AIR CLEANING CYCLE

- 1 Suction**
Unhealthy air and dust are sucked up and conveyed inside the machine.
- 2 First filtering**
Unhealthy air is subjected to a first filtering using water.
- 3 Output of clean air**
A second filtering operation is then carried out by the exclusive "molecular separator" that manages to intercept and reject even the smallest particles.
- 4 Output of clean air**
These two natural filters expel healthy, clean and perfumed air.

standard accessories

Steam lance adapter

Extensions

Tank filling bottle

Multifunction brush

Handle with hose

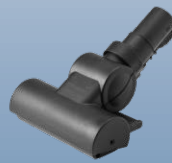

150-mm opening

Wiper

Kit sanitation maxi

Vaporizing turbo brush

Iron

Turbovapor

High efficiency turbo brush

Extendable hose

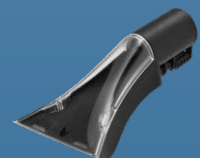

Vaporiser

Natural essential oils

Acqua Clean

Transparent opening

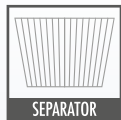

optional accessories

Technical data

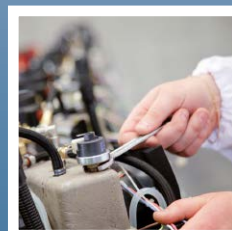

Suction: **2400 MM**
Motor power: **1200 WATT**
Dimensions: **37 X 30 X 41 CM**
Steam pressure: **6 BAR**
Boiler power: **1800 WATT**
Boiler volume: **1,3 L**
Refilling system: **AUTOMATIC**
Steam ready: **5 MIN**
Water tank for steam: **1,5 L**
Water filter capacity: **5,5 L**

Some important features

- > Shockproof and high-resistance plastics
- > Built-in rubber cord winder
- > Intuitive cooled ergonomic handle
- > Control panel with digital display
- > Controls and settings also on the handle
- > Dual-turbine motor
- > Excellent holding capacity of up to almost 6 litres
- > Biggest water filter in its class
- > Molecular separator
- > 6-bar steam with unlimited autonomy
- > Energy saving boiler
